

Takemoto Colour Selection

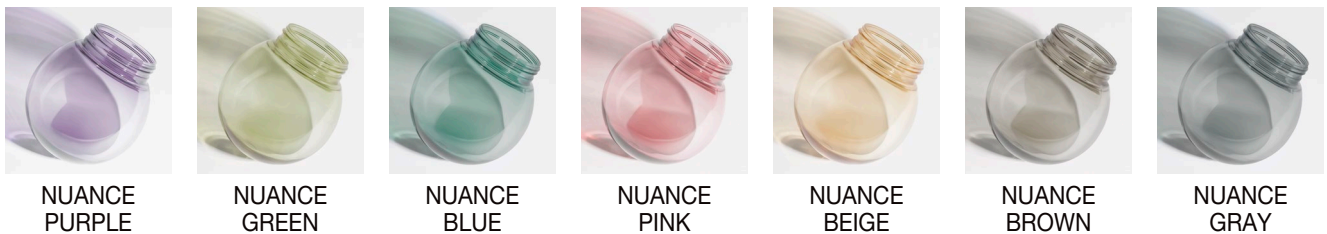

Time efficient & small-lot production

The Takemoto Colour Selection for PET material injection stretch blow molded (ISBM) products is now available. This selection of stock colours allows you to shorten the development period from planning to commercialization. (Some products are not compatible)

Standard Colours:PET This selection of 19 colours for PET material can be used to colour-coordinate your product lineup.

Trend Colours:PET As an alternative from the standard colours, we have selected 7 trend colours with gentle, nuanced tones.

Made-to-order with an MOQ of 3,000 units. Please contact our sales office for details. Please check product samples to confirm the actual appearance of the colour.

* Variation of colour intensity possible

Takemoto Colour Selection

Time efficient & small-lot production

The Takemoto Colour Selection for PP material injection molded products is now available. This selection of stock colours allows you to shorten the development period from planning to commercialization. (Some products are not compatible)

Standard Colours:PP This selection of 22 colours for PP material can be used to colour-coordinate your product lineup.

Trend Colours:PP As an alternative from the standard colours, we have selected 7 trend colours with gentle, nuanced tones.

Made-to-order with an MOQ of 3,000 units. Please contact our sales office for details. Please check product samples to confirm the actual appearance of the colour.
*In PP, the purple colour is the same as the standard colour.
